

Course Title:	Introduction to EAZA <i>Ex situ</i> Programme Management
Tutors:	Elmar Fienieg, Population biologist, Conservation and Programme Management, European Association of Zoos and Aquaria (EAZA) Merel Zimmermann, Animal Programmes & Conservation Coordinator, European Association of Zoos and Aquaria (EAZA) David Aparici Plaza, Animal Programmes & Conservation Coordinator, European Association of Zoos and Aquaria (EAZA) and other experienced tutors from the EAZA community
Aimed at:	EEP, ISB and ESB coordinators (coordinators get priority when booking places)
Stage:	2
Language taught in:	English
Taught hours:	24(3,5 days)
Extra hours for study etc.:	8-16 depending on background, previous experience with ZIMS and language skills
Cost:	EAZA members: €295 Non-members: €365
Minimum group size:	15 (split into two groups)
Dates:	5 December – 9 December 2022
Delivery Method:	Face to Face and self-paced pre-course exercises
Location(s):	EAZA Executive Office, Amsterdam
Links to other courses:	Participants are expected to complete the online ZIMS for Studbooks course before attending the live sessions. Leads onto the Advanced EAZA <i>Ex situ</i> Programme Management course, covers content from EPZQF 4.2.5 Population Management Programmes

Course Aim(s):

This course enables those coordinating the EEPs (EAZA Ex situ Programmes) and keepers of ISBs (International Studbooks) and ESBs (European Studbooks) to gain a deeper understanding of the genetics and demographics of breeding programmes. It will give an in-depth introduction into the use of new globally used studbook software (ZIMS for Studbooks) and a first view of the software designed to support the management of breeding programmes to ensure appropriate records are kept and demographic and genetic diversity managed (PMx). The skills and understanding learnt on this course will enable greater confidence and ability in appropriate decision making when managing breeding programmes to help conserve species.

Learning Outcomes:

By the end of this course you will be able to:

1. Identify requirements for basic genetic management of populations and how this can be applied to captive populations
2. Use specialised software to record and analyse demographic information for population management of species
3. Discuss the practicalities of running a programme
4. Identify the roles of EAZA and managed programmes in supporting conservation of species

Content:

- Why manage zoo populations
- Small population management to include mean kinship and genetic inbreeding
- Population demographics and factors that affect population goals

- Use of specialist software such as ZIMS and PMx. Introducing web-based tools
- Working procedures and EAZA structures
- Practicalities of running a managed programme, including common problems and how to manage them

Assessment:

None

Additional information:

Participants will be split into 2 groups, you will need to be in Amsterdam for a maximum of 3,5 days. You will be sent pre-course modules and exercises as well as information to read through and practice with before the start of the course to help you prepare (approximately 8-16 hours personal study required).

For this course you will need a laptop to work on during the course (preferably a PC). The EAZA Executive Office has a small number of laptops that you can borrow by prior arrangement.

How to apply:

Online application is by invitation only, prioritising current and incoming EEP and ESB coordinators and their assistants. If you believe you should be on the invitation list please contact laura.myers@eaza.net with details of your involvement in population management.
